### GITHUB

github.com/Ollie-C

React developer with a strong focus on intuitive, user-centered design. Experienced in diverse work environments, including several years living and working in Japan. Passionate about creative problem-solving and building impactful solutions.

## EXPERIENCE

### Developer | Twogether 04/23 - 03/25, London

- Promoted to mid-level after 9 months
- Contributed to a two-person dev team, managing multiple concurrent projects using GitLab with integrated CI/CD pipelines.
- Led frontend development with React and Next.js, building custom applications with a strong focus on user experience and performance.
- Applied strict TypeScript standards and TDD using Jest and React Testing Library.
- Maintained and debugged legacy backend systems built with PHP and Symfony; managed MySQL and PostgreSQL databases via tools like Sequel Ace.

### International Admissions | UAL 01/22 - 08/22, London

- Demonstrated organisation and accuracy to successfully coordinate thousands of student applications using SITS management system

### Host Relationship Manager | HFS London 05/19 - 09/20, London

- Managed over 300 user accounts, B2B + B2C design projects

### English Instructor | GABA Mar 15 - Mar 18 Tokyo

## SKILLS

### Core Development

Frontend: Typescript, React, Vite, Tailwind, Sass, A-Frame

Full-stack: Next.js, Python, Node.js, Express, Supabase, MySQL, GraphQL

### Tooling & Infrastructure

NPM, Bun, Docker, Jest, Vitest, AWS, GCP, Vercel, Capacitor, Electron

### Collaboration

Figma, Trello, Github, Gitlab, Jira, Teams

### CMS Development

Sanity, Hubspot (Hubl)

## EDUCATION

### BrainStation | Diploma in Software Engineering

08/22 - 11/22, London

### Udemy - Colt Steele | “The Web Developer Bootcamp”

03/22 - 12/22, Online

### Coursera - University of Michigan | “Python For Everybody”

11/20 - 01/21, Online

### Oxford Brookes University + University of Kitakyushu | BA (Hons) in Japanese Studies

09/10 - 01/15, Oxford/Fukuoka

## PROJECTS

### Hibi

A non-bloated goal tracker app, simple UI, full-stack personal project

*React, Supabase, Tailwind, Motion, Capacitor*

### Lenovo Room Configurator

Room configurator app for businesses to build product wishlists

*React, Sass, i18n, Jest, AWS*

### myvu

Social movie ranker - *in progress*

*Next, Sass, Tanstack-Query, Supabase*

### Umi

Conceptual sustainability loyalty card

*React, Firebase, Express, GCP*
