

OLIVER CROSS

FULL-STACK ENGINEER

EMAIL iio.olivercross@gmail.com
LINKEDIN linkedin.com/in/oliver-cross

Full-stack engineer with over 5 years experience specialising in building scalable and performant web applications. Skilled in end-to-end development and experienced in API builds and integrations, system migrations, and cross-functional collaboration across Japan, UK, Eastern Europe and Australia. Passionate about delivering user-friendly products.

EDUCATION

BA (Honours) in Japanese Studies
Oxford Brookes University + University of Kitakyushu - 09/10 - 01/15, Oxford/Fukuoka

QUALIFICATIONS

- Japanese Language Proficiency N3 Certificate 01/17, London
- Diploma in Software Engineering BrainStation - 08/22 - 12/22, London
- Data Science Course BrainStation - 03/23, London

SKILLS

Portfolio: <https://ori-x.dev>
Github: <https://github.com/Ollie-C>

Spoken Languages: English (Native), Japanese (Conversational)

Tools:

Frontend

JavaScript, TypeScript
React (Next, Vite)
SvelteKit
TanStack Query
Zustand
Tailwind
HTML5
CSS3/Sass

Backend & Data

Node.js (Express)
Python (Django, FastAPI)
PHP (Symfony, Laravel)
REST
GraphQL
Authentication (JWT, OAuth)
PostgreSQL, MySQL
Supabase

Infrastructure, Testing & Tooling

Docker
Kubernetes
AWS (S3, Cloudfront)
CI/CD
Auth0
Git
Jest + RTL, Vitest
Sentry

PROFESSIONAL EXPERIENCE

Full-stack Engineer | Freelancer

09/2025 – Present | International

Project: Football News Web & Mobile App

- **Tech:** TypeScript, React, Laravel, Tailwind, REST APIs
- Developed a responsive sports news platform with real-time API integration for live scores and feeds.
- Delivered cross-platform builds to support both web and hybrid mobile deployments.

Personal Impact:

- Designed a modular component-based frontend, accelerating feature delivery by 2x compared to the original development schedule.
- Led client communications, requirement definition, QA testing, and launch.
- Implemented caching and DOM optimization strategies, improving Lighthouse performance from 45% to 95% and significantly reducing time-to-interactive.

Full-stack Developer | Broadbent Group (Purple IO)

04/2025 – 08/2025 | UK

Project: sFTP Client + Chrome App – <https://sftpapp.com>

- **Tech:** Next.js, TypeScript, Symfony (backend), Docker, Kubernetes, Electron, Chrome APIs
- Contributed to the redevelopment of an internal sFTP client platform and Chrome extension used by multiple teams.
- Migrated core product from Angular to Next.js, improving performance and maintainability across thousands of active sessions, and reducing average page load time from 8 seconds to around 3 seconds
- Deployed infrastructure via Docker and Kubernetes, ensuring stable releases and scalable updates.

Personal Impact:

- Led frontend migration efforts and implemented the API integration layer with Symfony backend.
- Proposed and delivered architectural improvements that reduced build times and improved CI/CD stability.
- Owned the testing and delivery pipeline for Electron and Chrome extension deployments.

Full-stack Developer | Twogether

04/2023 – 04/2025 | London, UK

Project: Lenovo Classroom of the Future

<https://techtoday.lenovo.com/us/en/solutions/education/classroom-of-the-future>

- **Tech:** React, TypeScript, Sass, Jest, React Testing Library, GitLab CI/CD
- Led development of a core Lenovo Tech Today app used across SEA, EMEA and NA
- Launched 5 localized deployments (Classroom, Warehouse, Hospital, Campus, Store), each supporting 20+ translations.
- Application serves thousands of daily users and supports Lenovo's B2B hardware sales teams across multiple global regions.
- Built modular UI architecture that reduced delivery time for new features, enabling faster rollouts across GEOs.
- Integrated seamlessly with Drupal CMS for management by 100+ Lenovo marketing teams worldwide.

Personal Impact:

- Implemented CI/CD pipelines, automated testing, and code review workflows.
- Worked closely with backend and design teams to ensure seamless deployment
- Built pixel-perfect landing pages from Figma and Zeplin designs for AWS, Samsung, Juniper and Hitachi
- Optimized page performance through lighthouse audits

Other projects:

- Lenovo Room Configurator – <https://techtoday.lenovo.com/jp/ja/room-configurator>
- Pentaho (Hitachi Vantara) Skill Assessment – <https://pentaho.com/data-fit-assessment>
- Dell GameHub 360 (Sunsetted) - <https://www.wearetwogether.com/work/case-studies/dell-game-hub>
- **Tech:** Django, Next.js, JavaScript, TypeScript, Docker, Kubernetes, Jest, React Testing Library, GitLab CI/CD, Symfony, Sentry, MySQL, AWS, pdf-lib, Hubspot, Wordpress

Personal Impact:

- Developed both in-house products and B2B applications for large corporations
- Introduced TypeScript standards and enforced testing with Jest/RTL
- Handled cross-functional coordination with design, backend, and marketing teams.
- Managed deployment and troubleshooting in a multi-project, fast-paced environment.

International Administrator | University of the Arts London (UAL)

01/2022 – 08/2022 | London, UK

- Managed SITS database system to manage thousands of applications
- Coordinated with international student stakeholders and institutional partners.
- Experience with cross-cultural communication, process optimization, and stakeholder management.

Administrator | HFS London

05/2019 – 09/2020 | London, UK

- Website maintenance using HTML, CSS and Wordpress
- Managed host relationships and handled operational communication in an international environment.

English Instructor | GABA Corporation

03/2015 – 03/2018 | Tokyo, Japan

- Maintained company high 4.84 rating, within the top 5% of all instructors
- Taught English to professionals in Tokyo; developed strong intercultural communication skills
